Summary

Full Stack Software Engineer with hands-on experience in building scalable MERN and Flutter applications, specializing in backend architecture, API development, and performance optimization. Proven experience in system design, RBAC implementation, caching strategies, and real-time data handling, with strong problem-solving skills and national-level hackathon achievements.

Skills

Languages: JavaScript, TypeScript, Dart, C++, Python, SQL

Frontend: React.js, Next.js, Flutter, HTML, CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Database: MongoDB, MySQL

Tools & Technologies: Git, GitHub, Postman, Docker (Basics), Firebase

Concepts: Data Structures, System Design Basics, RBAC, Caching, API Design

Experience

Full Stack Developer

March 2025 – Present

Sheen AI (On-site)

Tech Stack: React, Node.js, MongoDB

- Developed and maintained **scalable MERN-based applications** using Node.js, React, and MongoDB, supporting high-performance e-commerce workflows, real-time inventory updates, and order processing.
- Actively involved in **database schema design and system architecture**, contributing to scalable backend structures and efficient data modeling.
- Designed and implemented **Role-Based Access Control (RBAC)** across applications, ensuring secure access management and adherence to system-level security practices.
- Worked on **application security and backend reliability**, implementing best practices for secure API development and data protection.
- Built an **end-to-end image compression pipeline** with **frontend-based caching mechanisms**, optimizing media delivery and reducing load times.
- Developed **Excel-based data upload and processing systems**, handling large datasets and enabling efficient bulk operations.
- Collaborated with **Flutter mobile teams, MERN developers, and external partners**, integrating third-party systems (including SQL-based platforms) with MongoDB services for seamless cross-platform data flow.
- Contributed across **both frontend and backend development**, ensuring smooth UI/UX and robust server-side performance.

Technical Research Intern (Jr. Scientist)

June 2024 – Dec 2024

National Technical Research Organization (NTRO), Govt. of India

New Delhi, DL

- Worked on projects related to **cybersecurity, blockchain, and artificial intelligence/machine learning (AI/ML)** within a government research environment.
- Conducted technical research under senior scientists, contributing to **analysis, experimentation, and applied research methodologies**.
- Gained hands-on exposure to **secure systems, emerging technologies, and real-world research problem solving**.

Full Stack Web Developer (Intern)

June 2023 – August 2023

ACCMI Association

Palghar, MH

- Developed and deployed the official website (www.accmi.in), enhancing the organization's digital presence.
- Built a responsive full-stack web application with a focus on performance, scalability, and cross-device compatibility.
- Collaborated with stakeholders to gather requirements and implement features aligned with organizational needs.
- Designed and integrated frontend and backend components to ensure seamless functionality and user experience.
- Improved communication and visibility for a network of **32+ colleges and institutions across India**.

Web Developer Intern

Aldel Education Trust

March 2023 – May 2023

Palghar, MH

- Developed and maintained the official website for the **Talent Search Examination**, improving accessibility and user engagement.
- Worked as a Full Stack Developer, implementing both frontend and backend functionalities for dynamic and responsive web applications.
- Managed and maintained websites for **5+ institutes** under the trust, including **St. John College of Engineering and Management**, **St. John College of Pharmacy and Research**, and **St. John College of Humanities and Sciences**, ensuring performance, security, and regular updates.
- Collaborated with stakeholders to gather requirements and deliver scalable solutions aligned with organizational goals.

Software Engineer Intern

Advisor On Web (AOW)

May 2022 – August 2022

Boisar, MH

- Contributed to the development of a startup platform (**advisoronweb.com**) in collaboration with RetailInvestors.in, supporting early-stage product development.
- Worked on **PHP-based full stack development** with **MySQL** as the database, building dynamic and data-driven web applications.
- Designed and implemented database schemas, ensuring efficient data storage, retrieval, and scalability.
- Developed backend systems and business logic using core PHP, handling data processing, authentication, and server-side functionalities.
- Managed and structured large datasets, improving system performance and reliability.
- Collaborated in a startup environment, contributing to rapid feature development, debugging, and deployment cycles.

Awards & Certifications

- **Winner – Smart India Hackathon 2022 (SIH'22) — Team Leader:** Led team *Ethical Coders* to win the national grand finale by developing an **Aadhaar-based student authentication system** to prevent duplicate and fraudulent enrollments (Problem Statement OS870, Government of Maharashtra).
- **Winner – Smart India Hackathon 2025 (SIH'25) — Team Mentor:** Mentored team *Git-Ignite* to secure the national grand finale victory by building a **telemedicine platform for rural healthcare access**, improving accessibility and remote consultation (Problem Statement SIH25018, Government of Punjab).
- **Finalist – Smart India Hackathon 2023 (SIH'23) — Team Leader:** Led team *Crypto-Pirates* to the grand finale at NIET, Greater Noida by developing a **TOR (.onion) hidden service enumeration system** for cybersecurity analysis (Problem Statement SIH1455, NTRO).

Education

BE Computer Engineering

University of Mumbai

Graduated: 2024

CGPA: 7.5 / 10
